The 1<sup>st</sup> of june 2007 has started the new sistem of regularization (REACH n. 1907/2006 CE) to evaluate, registrate and control the immission of substances and chemical preparations on the European market.

All the chemical substances produced or imported on the European Union in a quantity higher than 1 ton/year must be registrated to European Chemical Agency (ECHA).

About this matter, our company is only a final user and so it's not obliged to present, and will not present directly, any practice to pre-registrate chemical substances.

This task is up to our suppliers,who will regularly pre-registrate and then registrate them.

Basing on the declaration of our suppliers, we could exclude that on the product that we are working and selling, "worrysome" substances (SVHC) are present in a concentration higher than 0,1%(and so not subject to be notified as per comma 2,4 of art. 7 of the Regulation) and we could declare that this substances are responding to national, european and international eco-toxicological requirement, so they satisfy the restriction imposed by the regulation for these products (aromatic ammin, heavy metals etc.).

Beginning on 1<sup>st</sup> of June 2009 this restriction will replace the actual laws included on the European Directive 79/769/CE.

Our articles agree with limitations about the content of other micropollutants known as dangerous on textile products: formaldeid, pentachlorofenol etc.

Moreover, all our products answer to quality standards imposed by Oeko-Tex. Our certificate could be downloaded from our website [www.torciturapadana.it](http://www.torciturapadana.it) .

Our company is engaged to let know all possible information about changes and adjournments of the above declarations.

We rest at your disposal for further information.

Best regards,

**Torcitura Padana spa**
